Code Enforcement Induced Application Penalty — Double Fee

Applications made to resolve Code Enforcement action will be subject to twice the normal Land Use Application fee.

Fee Schedule Special Provisions:
Certain projects require significantly more resources of the County to review than other projects. Examples include, but are not limited to, energy facilities, state or federal facilities, large scale developments, and projects with regional impact.

These projects involve more resources of the Planning Department and other county departments due to their complexity and their overall impacts on the community. The demands placed upon the Planning Department in effect jeopardize the ability of the Department to meet other obligations such as processing local applications and completing routine planning activities.

For these time consuming and large-scale projects that require excessive departmental resources to review, the Planning Director may require the applicantto sign a Memorandum of Agreement to compensate the County for actual costs incurred to complete the review of a project and process an application in a timely manner. Funds obtained through the Memorandum of Agreement may provide a means for the County to retain extra temporary personnel, or to cover other personnel, administrative, travel or material costs.

Therefore, if it is determined by the Planning Director at the time of initial application or at any time during the application process, that stafftime and department costs to process a specific land use application will be significantly greater than that of other typical applications, the Planning Director may require an applicant to enter into a Memorandum of Agreement with the County which wouldestablish a fee based upon actual staff time and departmental costs.

In terms of energy facility review, the Planning Director may require the applicant to sing a Memorandum of Agreement at the time after the Notice of Intent is filed with the Energy Facility Siting Council or the Department of Energy, or upon submittal of an application for local permits. If the State of Oregon Energy Facility Siting process, as date this ordinance becomes effective is superseded, the County shall continue to retain authority to require a Memorandum of Agreement for local review of energy facilities.

If an applicant refuse to enter into a Memorandum of Agreement or there is failure to negotiate an acceptable fee, the applicant may appeal the Planning Director's decision to the County Court for resolution. If the applicant and the County fail to reach an agreement, the application will not be processed.

NOTE: Regarding Environmental Assessment and Impact Reviews: We have found that the hours spent reading and researching these assessments are not only costly, but in fact, we wind up doing or supplying data used by consultants who, in turn, charge their clients for work we have done.
